DataOnline selected as Top M2M Company in 2008

Berkeley Hts., NJ – December 6th, 2007.

M2M magazine has published this year's 2008 M2M 100, a directory of the most influential providers of machine-to-machine technology. DataOnline has been named to the prestigious list that includes major corporations like Accenture, Motorola, Sprint and Verizon Wireless. Technology providers named to the M2M 100 are chosen from a compilation of over 300 companies gathered from various sources. Examples of the criteria used to compare companies are strength of business model and product/service portfolio, momentum and activity in the last 12 months, growth potential, and much more. The M2M 100 is widely regarded as the definitive record of companies comprising the rapidly emerging machine-to-machine technology market.

"The 2008 M2M 100 directory provides a snapshot of a burgeoning market and identifies the companies with the greatest impact on its direction," said Michael Jarosik, Editor, M2M magazine. "With newfound stability among technology providers, end-to-end solutions are becoming more easily attained and implemented, delivering dramatic return on investment to end users."

About DataOnline

DataOnline® is a leading global provider of M2M (Machine To Machine) solutions specifically for the monitoring of remote industrial assets. DataOnline specializes in robust and reliable hardware, data acquisition, wireless communications and advanced Web based information management services. Our total end-to-end solutions are quick, easy and cost effective putting you in control with the power to continuously monitor, assess and manage your remote assets via the Internet. From logistics to maintenance and environmental compliance to sales, DataOnline has the right monitoring solution for your business application.
