DataOnline signs contract with Google to integrate online Maps Service.

Berkeley Heights, NJ – December 19th, 2006 - DataOnline LLC announced today that it has signed a contract with Google to use its new online Mapping service and has completed the integration of it with its DataOnline® web service for the remote monitoring of assets.

“The integration of Google Maps is just another step in our road map to maintain the very best remote monitoring web based product on the market. The mapping interface adds tremendous value for our customers of both our fixed and moving asset monitoring products. They are already using the new features and it has been extremely well received” commented Martin Adams, DataOnline COO.

About DataOnline

DataOnline is a leading global provider of M2M (Machine To Machine) solutions specifically for the monitoring of remote industrial assets. DataOnline specializes in robust and reliable hardware, data acquisition, wireless communications and advanced Web based information management services. Our total end-to-end solutions are quick, easy and cost effective putting you in control with the power to continuously monitor, assess and manage your remote assets via the Internet. From logistics to maintenance and environmental compliance to sales, DataOnline has the right monitoring solution for your business application.
